# Ben Placeholder-Ortiz

Backend Software Engineer

test.candidate02@example-test.com | (000) 000-0002 | Testville, TS

## SUMMARY

Fictional backend engineer profile generated purely for testing resume-parsing and keyword-matching systems. Not a real person.

## SKILLS

Java, Spring Boot, Python, Django, REST APIs, PostgreSQL, Docker, Kubernetes, Microservices, Git

## EXPERIENCE

**Backend Engineer — MockScale Systems (Synthetic)** (2020-2024)
Designed REST APIs with Spring Boot and Django; containerized services with Docker and Kubernetes; managed PostgreSQL schemas for microservices.

**Software Engineer I — Demo Software Labs (Synthetic)** (2018-2020)
Maintained Java services, wrote unit tests, and used Git for version control in a simulated production environment.

## EDUCATION

B.S. in Computer Science (Synthetic University), 2018

*Disclaimer: This is a synthetic test document with a fictional name and fictional details, created solely for testing keyword-matching / resume-parsing software. It does not represent a real person.*
